

The relationship between open standards and open source software

James King
Adobe Systems Inc.

Douglas Johnson
Sun Microsystems, Inc.

Open Standards - Stakeholders

Multiple Stakeholders

- Creators
- Implementers
- Users

Ken Krechmer, Fellow, International Center for Standards Research, University of Colorado, krechmer@csrstds.com

<http://www.csrstds.com/openstds.html>

Open Standards - Rights

	<u>Creators</u>	<u>Implementers</u>	<u>Users</u>
Open Meeting	X		
Consensus	X		
Due Process	X		
Open IPR	X	X	
One World	X	X	X
Open Change	X	X	X
Open Documents		X	X
Open Interface		X	X
Open Use		X	X
On-going Support			X

Open Source/ Open Standards Issues

Why standardize IT at all?

Do standards inhibit innovation?

How do standards encourage innovation?

How should standards bodies address IPR?

Must open standards be royalty free?

Software Development

Architect → Prototype → Create Specification → Review → Standard

Software Contribution → Development Cycles → Deployment

- Who does it
- Who gets it
- Who owns it
